PROPOSED PROJECT NAME:

Project SOS (Save Our Species)

SUMMARY / BRIEF DESCRIPTION ABOUT THE PROPOSED PROJECT

Project SOS (Save our Species)

This project revolves around animals around the world which are in danger of becoming extinct, but are not on the list of 'protected' animals. Each school chooses one such animal and organises an awareness programme in their school about the selected endangered species in the hope that the animal will be placed under the protection programme.

RATIONALE FOR THE PROJECT:

This project hopes to raise awareness in our youth of today of the effect our progress has on nature and the habitat of the animal kingdom. In a way that we are concerned about global warming and environmental issues, we should also focus on preserving as many species of animals as we can.

EXPECTED CONTRIBUTION FROM ASIAN SCHOOLS/STUDENTS:

Students are to work on a plan of the awareness programme which they wish to conduct in their school. (the programme may be modified along the way as long as it still has the same end result). The programme must incorporate at least 3 different ways in which students in the school are made aware of the plight of the near extinct species of animals.

Each participating school is responsible for setting up their own webspace for their project. This would be linked to the main webpage of the project which would be created by the project coordinator's team. Teachers are to ensure that the project webspace is accessible most of the time so students can follow the progress of each school. Comments and questions are to be e-mailed to the respective teachers who must then post these up on the web as well as respond accordingly to them.

EXPECTED CONTRIBUTION FROM EUROPEAN SCHOOLS/STUDENTS:

Same as above
